## Accomplishments

- CGPA : 9.02 in Integrated M.Sc. Computational Statistics and Data Analytics
- Awarded Merit Scholarship by VIT for the academic year 2024-25 for outstanding performance in Integrated M.Sc.
- CENTUM (perfect score) in Mathematics in the School Leaving (Higher Senior Secondary) Examinations.

## Skills

MySQL	<div></div>
Python	<div></div>
R Programming	<div></div>
Tableau	<div></div>
PowerBI	<div></div>
Java	<div></div>
Kotlin	<div></div>

## Certifications

- Udemy : Generative AI and LLM with Python : Plus Real-World Projects
- Coursera/IBM : Artificial Intelligence Essentials V2
- Coursera/IBM : Software Engineering Essentials
- Coursera/Tableau(Salesforce) : Introduction to Tableau

## Hobbies

- Playing Keyboard
- Calender Date Recollection

# Shreyas B Srinivasan

## Budding Data Analyst

Data Science enthusiast with hands-on Python, SQL, basic Kotlin and Java experience from a nine-month internship. Actively seeking full-time employment opportunities in Data Analytics, AI and ML in a global SaaS product company.

## INTERNSHIP AND PROJECTS

### July 2024 - April 2025

*SuperOps Technologies Private Limited (SuperOps Inc.) (SaaS + AI company) | Chennai, India*

#### SOFTWARE ENGINEER INTERN - AI TEAM & REVOPS TEAM

- Streamlined script generation using Ollama LLMs (Phi, Gemma, etc.), improving accuracy and overall script quality while reducing manual corrections.
- Enhanced backend team productivity by optimizing the script generation process, reducing manual effort, and speeding up implementation.
- Analyzed IT tickets and invoice data, identifying trends to aid the product management team in better tactics.
- Gained hands-on experience with OpenSearch, dbt to BigQuery code conversion.
- Self-learned SpringBoot and Kotlin programming through online courses, strengthening backend development skills for script generation features.
- Completed AWS course focusing on Amazon Bedrock, contributing to the feasibility study for integrating AI and cloud services into the script generation feature.
- Automated the dashboards for the RevOps team (worked on the analysis of deals of various types), which boosted my understanding of the revenues, sales and marketing of a SaaS company.
- Worked on the development of the Proof of Concept (POC) of Sales Leaderboard Analysis, which led to the improvement in the performance and motivation of Account Executives.
- Participated in the SuperHack 2025 Hackathon, with the team Deepseekers, which worked on the AI-powered financial consultant tool. It improved my collaboration skills and received the exposure of participating in a Hackathon.

### May 2023 - July 2023

*Positive Integers Private Limited | Chennai, India*

#### DATA SCIENCE INTERN

- Successfully converted Pyspark scripts to Python, improving code readability and efficiency.
- Developed functions for interpolation and extrapolation of transaction data, enhancing data analysis capabilities.
- Conducted Market Basket Analysis to identify product pairing trends for an FMCG company.

## ACADEMIC PROJECTS

- 'Data Visualization on salaries of data scientists: SET project 2' : Did an exploratory data analysis (EDA) and data visualization of salaries of data scientists around the world from year 2020 to 2023.
- 'Oil Supply throughout the world : SET project 1' : Analyzed the impact of oil throughout the world. I also constructed a multiple regression model which predicts the price of oil.
- 'Trip to Mars' - 'Lean Startup Management': Conducted an in-depth cost analysis study for a Mars expedition project, exploring tourism, resource extraction, and colonization aspects.
- 'Impact of TQM practices in FMCG industry': Analyzed Unilever's global TQM implementation, highlighting its positive impact on revenue, profitability, and quality, emphasizing the importance of strategic quality enhancement.

## EDUCATION

### Sep 2020 - Jun 2025

*Integrated M.Sc. Computational Statistics and Data Analytics*

Vellore Institute of Technology, Vellore Campus, Tamil Nadu

- CGPA - 9.02/10 | Basics in Python, R, MySQL, Java | AI and Deep Learning | Time Series Analysis and Regression analysis
- Stood University 7<sup>th</sup> in the Integrated M.Sc. programme.

### Nov 2020 - Present

Institute and Faculty of Actuaries, UK

- Cleared Actuarial Statistics paper (CS1) in Apr 2022
- Cleared Actuarial Mathematics paper (CM1) in Apr 2025

### Jun 2008 - Mar 2020

Vaels International School, (ICSE/ISC curriculum)

- Achieved a perfect score (CENTUM) in Mathematics in the School Leaving (Higher Senior Secondary) Examinations.
- Secured 89% Overall.
- Stood school 2nd during the school leaving examination.

## ATTRIBUTES

- Appreciated by my seniors in SuperOps Technologies, for my dedication, hardwork, sincerity, genuine curiosity and passion towards my work.
- Strong analytical and problem-solving skills honed through coursework and practical experience.
- Dedication and perseverance, consistently achieving academic excellence.
- Detail-oriented approach to tasks, ensuring accuracy and precision in data analysis.
- Adaptability and a willingness to learn new tools and techniques in the field of data analytics.
- Proven ability to navigate and adapt to diverse social and professional environments, with a keen awareness of personal sensitivities.
